

# Planet Doggle

Doggle is made up of mostly mountains, forests and deserts; inhabitants of the planet are dogs.

## Tropical region

In Wonderland Island there are huge forests which are a perfect hunting ground for the dogs; with lush trees providing excellent hiding places! (See above artist's impression of the dogs which inhabit the island.)

## Polar Region

The Polar region is the most mysterious. When the planet was discovered, the probe collected information from both Wonderland and Arid Island, but the probe was lost in Icey Island. (Refer to map)

## Mediterranean region

The cutest dogs live in this region - Maltipoo's, Pugs and Labradoodles. This region is hot, dry and has little rain, in the dry season they always go to Lake Treat, to meet the other packs!

## The Ocean's

These oceans are so shallow the dog's can walk from one island to the next.
